  - IDE (VSCode, PHPStorm)

EDUCATION

2020 - 2024
SWINBURNE UNIVERSITY
- Bachelor of Computer Science (Professional)

2014 - 2019
DE LA SALLE COLLEGE

BOX HILL INSTITUTE
CCNA (Cisco Certified Network Associate)

PROFILE

A competent full stack developer with a passion for crafting seamless web applications. I am currently working as a web developer and thriving on the opportunities to develop further skills and new concepts and technologies. I thrive in collaborative environments and approach each project with meticulous attention to detail. My technical toolkit includes front end technologies, HTML, React, TypeScript, Vue.js, Tailwind. Additionaly I am experienced in back end frameworks, Node.js, PHP, Laravel as well as DevOps tools, AWS and Docker.

WORK EXPERIENCE

Visual Moda   May 2023 - Present
Front-End Developer (Part-Time)

Web App Development Studio
My role is to convert Figma designs into working apps using React, TypeScript, and Tailwind on a Laravel base. My tasks involve converting older websites into the companies' current tech stack. An example task would be developing landing pages for new townhome projects for Nostra Homes. My responsibilities include transforming client-provided Figma UI designs into fully functional prototypes using React, TypeScript, and Tailwind CSS. These prototypes are then passed on to the backend development team for integration with their custom CRM system.

PS Design Studio   Feb 2025 - April 2025
Full-Stack Developer (1-month Contract)
Interior Design and Software Development Company

Rebuilt the company website, which was built on WordPress. My role was to use the exisiting design and rebuild it in Vue.js and Laravel (Statamic CMS).
You can view the staging link here: https://psdesign.netlify.app.

Jira ticket management for the client, Simonds Homes. These tickets were mainly bug fixes and minor UI updates which I successfully actioned.

Movember   Jul 2022 - Dec 2022
Junior Developer - University Placement
Charity Organisation for Men's Health:
I worked on applications using React TypeScript and Node.js in an Agile environment, contributing to two key projects: "Ahead of the Game," a mental wellbeing app for young athletes, and "Family Man," an educational parenting resource. My work included building interactive UI components, integrating backend services, and utilising AWS for database management and deployment pipelines.

You can find my projects here:
