Career Profile

Full-Stack Developer with front-end strength and Computer Science graduate with commercial experience building, modernising and maintaining web applications using React, TypeScript, Node.js and PHP/Laravel. Experienced in translating product designs into production-ready interfaces, integrating frontend applications with backend systems, resolving bugs, and maintaining live client websites. Recently, I have been using AI development tools including Cursor and Claude Code to accelerate implementation and repetitive development tasks. Moreover, I'm comfortable learning new technologies quickly, working across frontend, backend and deployment environments, and collaborating with technical and non-technical stakeholders in Agile and cross-functional teams.

Key Skills

- ▶ **Web Development:** Well-versed in applying contemporary, industry-leading tools and technologies across the development stack to craft full-featured web applications.
- ▶ **Analytical Thinking & Problem-Solving:** Adept at dissecting complex technical challenges and delivering efficient, scalable solutions that balance performance, maintainability, and user experience.
- ▶ **Stakeholder Engagement:** Able to engage and communicate effectively with both technical and non-technical stakeholders to understand business needs and gather requirements.
- ▶ **Teamwork & Collaboration:** Thrives in team-based environments, contributing proactively and respectfully in cross-functional Agile teams to achieve common goals and deliver high-quality outcomes.
- ▶ **Adaptability:** Quick to learn and adapt to new technologies, frameworks, and team processes. Demonstrated ability to pivot across tools and tasks in fast-paced development environments.

Technical Skills

- ▶ **Front-End:** HTML, JavaScript (React, Next.js, Vue, Nuxt, TypeScript, jQuery), CSS (Tailwind, Bootstrap), GSAP
- ▶ **Backend:** Node.js, PHP (Laravel), WordPress, Python (Django), SQL (MySQL, PostgreSQL, MsSQL), MongoDB, Java (Kotlin), RESTful API
- ▶ **DevOps and Others:** Docker, WordPress, GraphQL, AWS (S3 and Pipelines), Netlify, Heroku, Slack, Git (GitHub, Bitbucket)
- ▶ **Software:** Video Editing (Premiere Pro), Graphics (Figma, Adobe Illustrator, Photoshop)
- ▶ **IDE/AI Tools:** VSCode, PHPStorm, Cursor, Claude Code

Employment History

Metronome, VIC

October 2025 – August 2026

Front-End Developer

- ▶ Owned front-end delivery across multiple client website rebuilds, modernising legacy implementations into maintainable React, TypeScript and Tailwind CSS applications.
- ▶ Translated client-provided Figma UI designs into fully functional, responsive front-end prototypes, ensuring pixel-accurate implementation across devices.

- ▶ Developed and maintained WordPress websites, building custom ACF (Advanced Custom Fields) field structures to give clients flexible, easy-to-manage content editing capabilities.
- ▶ Integrated Cursor and Claude Code into day-to-day development workflows to accelerate repetitive implementation tasks and support faster project delivery.
- ▶ Managed production hosting, updates and performance maintenance for client websites on WP Engine, troubleshooting issues and maintaining site reliability.
- ▶ Collaborated within a cross-functional agency team, working flexibly across projects to meet client deadlines and business requirements.

Visual Moda, VIC

Developer (Part-Time)

May 2023 – October 2025

- ▶ Manage a high-volume workload, achieving project milestones through effective planning and prioritisation.
- ▶ Oversee the conversion of older websites into the company's current tech stack. As an example, I was tasked to recreate the website for Nostra Homes, converting it from a PHP Backend with a custom frontend to using the existing backend and updating the frontend using React TypeScript.
- ▶ Undertake a range of technical tasks, including using React, TypeScript, and Tailwind CSS to transform client-provided Figma User Interface (UI) designs into fully functional prototypes.
- ▶ Forward prototypes to the backend development team for integration with the custom CRM system.
- ▶ Created an online Task management system for the company using React TypeScript and Laravel PHP.

PS Design Studio, VIC

Software Developer (Contract)

February 2025 – April 2025

- ▶ Tasked with rebuilding the company website from WordPress, rebuilt it in Vue.js and Laravel (Statamic CMS).
- ▶ Oversaw Jira ticket management for Simonds Homes, successfully actioning tickets for bug fixes and minor UI updates.

Movember, VIC

Junior Developer – University Placement

July 2022 – December 2022

- ▶ Worked on applications using React, TypeScript, and Node.js in an Agile environment.
- ▶ Contributed to the success of two key projects: Ahead of the Game, a mental well-being app for young athletes, and Family Man, an educational parenting resource.
- ▶ Collaborated with diverse stakeholders, ensuring high-quality and timely project delivery.
- ▶ Performed a variety of hands-on tasks, including peer coding, building interactive UI components, integrating backend services, and utilising AWS for database management and deployment pipelines.

Qualifications

Bachelor of Computer Science (Professional) | Swinburne University, 2024

- TNE10005 - Network Administration - 86 - High Distinction
- COS10011 - Creating Web Applications - 83 - High Distinction
- COS30018 - Intelligent Systems - 78 - Distinction
- TNE10006 - Networks and Switching - 75 – Distinction
- SWE20001 - Managing Software Projects - 75 - Distinction

CCNA (Cisco Certified Network Associate), Box Hill Institute
